5 October 1984

MEMORANDUM FOR: C/OLL/LD

FROM:

[Redacted]

Chief, Evaluation and Plans Staff

25X1

SUBJECT: Request for Documents and DO Briefing for  
House Foreign Affairs (HFAC) Staff Consultants

REFERENCE: OLL 84-3539 dtd 24 September 1984

1. The travel itineraries of Marian Chambers and Richard Pena, House Foreign Affairs Committee (HFAC) Staff Consultants, and Thomas R. Smeeton, Minority Staff Consultant/Special Projects will be transmitted to the appropriate field stations with instructions that they are to be provided DI-type briefings by the COSs. The DO will not participate in the DO/DI briefing prior to their departures since the subject of narcotics can be covered sufficiently by the DI or the NIO on Narcotics.

2. Regarding the documents and information requested by the staffers, the following is furnished:

a. The 1981 Presidential Directive regarding narcotics.

This directive is Executive Order 12333 which covers intelligence activities including the collection of information concerning the foreign aspects of narcotics production and trafficking. A copy is attached for passing to the HFAC Staffers. The information contained in this Directive was also cabled to all our field stations.

b. Copy of Drug Enforcement Agency/CIA agreement.

The CIA/DEA agreement contains operational information which is limited to review by the Oversight Committees of DEA and the CIA, and can not be released to other Congressional staffers.

c. Verify existence of Administration guidelines that preclude the use of known traffickers for intelligence collection.

Administrative guidelines are contained in two DO Directives--one for Headquarters' guidance and a similar one distributed to the field for their guidance. In addition, the substance of the DEA/CIA agreement that spells out the CIA responsibilities and the functions of each Agency has been cabled to all our field stations. This information may be passed to the staffers, however the documents cannot be released to them.
